Success in a Volatile Market

NEW!
CPS
3.0

The market forces that came to a head in 2008 were unprecedented. We saw bailouts, credit freezes, and commodity price deflation—all happening at once. The stock market doesn't like uncertainty, but fearful markets can provide the largest profits. (I'll tell you why shortly.)

New Strategies for a New Market

Early in 2008 we released our Chart Pattern Recognition Module 3 or CPRM3. This new module divides key patterns (like Consolidations) into sub-patterns (Wedges, Rectangles, etc.). It also provides new “micro patterns” that often form before key breakouts.

Chart Patterns Systems 3.0 is based on the same technology, but there is a big difference. Whereas CPRM3 is used to visually see patterns in charts, CPS 3.0 is a collection of Strategies based on Chart Patterns that can be back-tested in OmniTrader. And that is precisely what we did!

Impressive Performance

The results are amazing. We tested all 7 CPS 3.0 Strategies over 2008 on the S&P 500 and found that several of them generated over 70% accuracy (see Strategy Performance Table on page 3). And ALL of them were profitable in 2008!!

Most of the trades were Shorts—not surprising since the market was dropping through most of 2008. With the recent repeal of the “up-tick” rule, short-selling is much easier. And in this market, selling the right stocks short at the right time can definitely “level the playing field” and lead to enormous profits.

CPS 3.0 has filters that help it avoid taking Long trades when the market is going down. As the market starts to rally again, the Strategies will do just the opposite, automatically favoring the Long side.

Chart Patterns are Key!

How is CPS 3.0 able to perform so well in such a volatile market environment? Chart Patterns measure the essence of market psychology—a solid pattern event is almost always followed by a large move.

Finds Profitable Trades in ANY Market!

Here are just a few examples...

TIE generated several Chart Pattern Signals in the first half of 2008, identifying several key reversal points.

DVN generated a number of Fibonacci Retracement Short Signals in the latter half of 2008 that were very profitable.

“The Signals from CPS 3.0 are fabulous!” – Jerry S.

Harness the Power of Patterns in 2009

and Take Charge of Your Financial Future!

Pattern Signals in 2008. This chart shows several powerful Chart Pattern Signals in 2008, including Fibonacci Retracements, Saucers, Gaps and Resistance Reversals. Given a rich selection of Chart Patterns in the Focus List, you can quickly identify the best setups using the techniques Ed Downs shows you in his Chart Patterns Trilogy seminar (pg. 6).

Let us show you how to use Chart Patterns to make money in the current market environment...

It's time to engage this market, and CPS 3.0 is the perfect tool for the job. Coupled with our *Trading Success with OmniTrader* seminar series (page 4), you will have all the tools you need to make 2009 a profitable trading year. And, if you order the bundle described on page 7, you also get Ed Downs' *Chart Pattern Trilogy* with your purchase—a special seminar in which Ed shows you how to identify the best patterns, where to place your stops and more!

CPS 3.0 is 100% Guaranteed!

CPS 3.0 comes with our 100% 90-day Money Back Guarantee, so you can try it at absolutely zero risk. Once you start prospecting and trading with these Signals, you are going to see just how powerful they are, and how much they can help your trading in 2009.

EVERY Strategy was Profitable in 2008!

Strategy	Accuracy	APR*
Consolidations	66.4%	6.4%
Fibonacci Retracements	73.1%	22.6%
Gaps	70.8%	12.5%
Saucers	73.3%	67.9%
Support/Resistance	69.7%	11.3%
Trend Lines	60.6%	12.4%
Volume Climax	68.5%	27.1%

Performance results for all Strategies on the S&P 500 from January 1, 2008 through December 31, 2008.

*APR is the average net Annual Percentage Rate of return for each Strategy, including both winning and losing trades.
