Get Ready for BIG GAINS in 2014!

Ed Downs
CEO and Founder,
Nirvana Systems, Inc.

I am pleased and excited to announce RTX-3 to our Nirvana customer base. This new Strategy collection has huge potential to improve your trading this year – all made possible by the new Strategy development tools in OmniTrader 2014.

Outstanding Strategy Performance

RTX-3 is based on three separate Real Time Strategies that look for trend-following swings in symbols identified by our scan process.

The result is a **MECHANICALLY PROFITABLE** System that can crank out one profitable trade after another. We have had great success trading these Strategies in our Trading Lab – see page 8 for details.

When you purchase RTX-3, you get the Strategy AND a starting list of Symbols to trade it on, putting you in the driver's seat of a *money-making dynamo*.

Trading the Right Symbols is Key

It's difficult to create Real Time Strategies that hold up mechanically over months of data, partly because of the volume of data required to analyze it.

Thanks to the new Real Time “batch” testing feature in OT 2014, we can now load thousands of intraday bars of data and perform Strategy Wizard runs on a single symbol. This has enabled us to do something we have never been able to do before – find the best symbols to trade.

Most stocks are not very good for trading in Real Time. They either (a) don't move enough or (b) are so volatile you can't manage the trade profitably. What we want is a stock or ETF with strong moves but low internal volatility, and that's what our new RTX Scan provides.

Using our proprietary intraday scanning technology, we identify the best possible list to trade every week and post it on our RTX-3 web site for customers to use. Just plug in the symbols and start trading! See page 6.

New Block Improves Any Strategy!

RTX-3 offers much more to the Real Time trader, because it's packaged with a very powerful new invention – the RT Block described on page 5. Just dial in how much move potential you want for each Signal, and the RT Block will isolate those Signals for you. It can be used with ANY trading strategy. Just drop it in using Strategy Builder and start testing and trading.

Then, there's the money management aspect of the Strategies. Our Strategy developers spent a great deal of time working on an optimal Trade Plan for the Strategies. Jeff Drake explains all about this in his *Profiting in Real Time with RTX-3* seminar (see page 10).

PLUS, an Extra Bonus!

We are VERY excited about the new Nirvana Trading Lab – a project that has been in the works for over six months. While our Lab has already been trading profitably, RTX-3 has made it even easier to find and trade the best moves!

With the release of RTX-3, we are bringing customers into the Lab to trade with us. You will gain extra insights on what makes the best trades, and can follow our trades daily as we place them.

What more can you ask for? You get the Symbols to trade, the Strategies to trade them, configurable technology you can use in other Strategies PLUS a Trading Lab to practice with us in the live market!

RTX-3 is the most comprehensive Real Time package we have ever offered. Get RTX-3 and make money with us in 2014!

Sincerely,

Ed Downs
CEO, Nirvana Systems, Inc.

Get it all with RTX-3...

Superb Lists, Great Strategies
and access to the New Trading Lab!

Start 2014 with a Bang

If you've been trading the markets in Real Time, you're going to LOVE the additional firepower our RTX-3 package provides. Running Great Strategies on highly qualified lists means more profits!

With Real Time trading, you can use extremely high leverage, typically 4-to-1. And, all these Strategies get out by the Close of the market, so there's no overnight exposure!

The RTX-3 package is your personal Path to Real Time Trading Success

Now is the time to take the next step in your trading, and I firmly believe that the RTX-3 package is your personal Path to Real Time Trading Success.

We are going to give you everything you need – the Symbols, the Strategies, and the DAILY training. All you have to do is show up and engage the market with us.

In this mailer, we are showing some of the trades from our Trading Lab. We'd love to have you share the success with us. Get RTX-3 and resolve to have your most profitable year ever!

RTX-3 is starting the new year off with a bang. On January 6th, RTX-3 landed two back-to-back Long Trades on Verizon netting more than 1% in under three hours.

“We are excited to showcase RTX-3 in the Trading Lab. It has already produced some big winners in 2014.”

– Ryan Belknap

A Powerful New Ally for Real Time Traders

The Science Behind RTX-3

RTX-3 represents a significant breakthrough in Real Time Strategy development. Our Developers took a fresh look at each step of the design process. We use various techniques to find the best setups for the hottest real time stocks, including higher timeframe confirmation.

The RTX-3 Strategies are designed to run in the 3 minute timeframe. While the strategies analyze the trend in the 3 minute chart, they also look at the 15 minute chart in order to determine the longer term trend.

With multiple timeframe confirmation established, the systems used in all three of the RTX-3 Strategies are designed to fire in the direction of the predominant trend.

The RTX-3 Trading Strategies

RTX-3 includes three different Trading Strategies. While each strategy uses the same filtering techniques and Trade Plan (see next page), the signal generation for each strategy is different.

RTX-3A looks for pullbacks against the major trend. RTX-3B is a pure momentum play as it looks for short term strength, and RTX-3C uses OmniTrader's classic voting process to find prime trend trading opportunities.

While each of these strategies can stand on their own merit, they are actually meant to be used in concert with each other in order to provide you with plenty of high quality intraday trades.

While the upward trend in the 3 minute chart for FB has stalled for over an hour, our 15 minute chart analysis determines that the upward trend is still intact, leading to an excellent entry point into the predominant trend.

All three RTX-3 Strategies work in concert in order to capture 8 out of 9 profitable trades on Tesla Motors in mid-December.

Higher Profits Less Risk

Profitable Trade Management

Each RTX-3 Trading Strategy uses the RTX-3 Trade Plan. This trade plan is designed to allow you to engage the market when a good setup exists, but also to limit your risk if the trade loses its momentum.

A Break Even Stop is used in order to keep our losses to a minimum. If a trade makes an initial move in our favor but fails to run, the Break Even Stop will take a small gain or loss. This allows us to continually trade good setups without fear of the trade turning too far against us.

Once we get a trade that runs in our favor, a Trailing Profit Stop is activated in order to catch as much profit as possible from the trade.

The example to the left shows the RTX-3 Trade Plan in action as it is applied to the same Facebook trade we featured on the previous page.

After the confirmed setup from the previous page, the RTX-3 Break Even Stop locks in a small profit on Facebook, but the trade continues to run and the Trailing Profit Stop captures the bulk of the move.

The NEW RT Trading Block

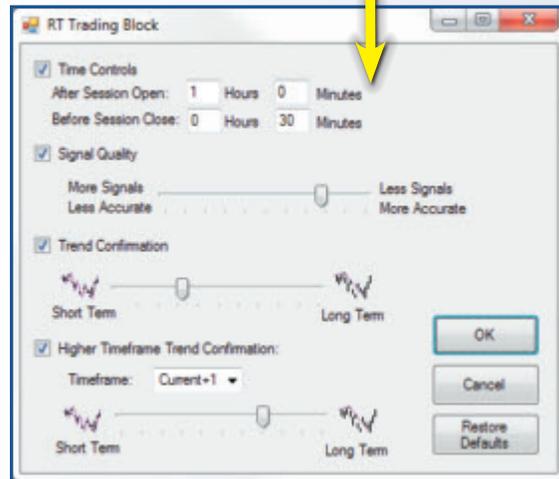

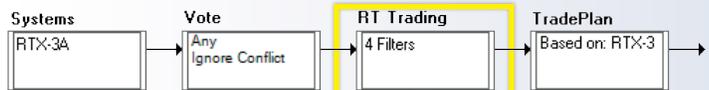

Instantly Improve Any Real Time Strategy with Ease

The high level of performance by RTX-3 comes, to a great extent, from our new RT Trading Block. This block can be easily added to ANY Real Time Strategy and gives you the ability to configure the following:

- Trading Start Time
- Trading Stop Time
- Signal Quality
- Current Trend Direction
- Higher Timeframe Trend Direction

The Signal Quality Filter allows you to turn up the quality of the signals for more mechanical trading, or turn it down to get more trades to prospect from.

Trend Direction makes it easy to filter by a more established trend or to look for quick trend changes. The RT Trading Block makes Real Time Strategy improvements as easy as drag and drop.

Higher Signal Quality Improves Accuracy

Signal Quality	Signals	Hit Rate
Low	1,173	73%
Medium	445	77%
High	112	83%

RTX-3's Outstanding Performance

RTX-3 Harnesses the Power of Selective Stocks & ETFs

When you think about what it takes to trade successfully in Real Time, several things come to mind. Clearly, we want to trade with the market where possible. But we ALSO want to trade those Symbols that are prone to move intraday.

The new RTX-3 Strategies work extremely well on symbols that show strong movement on an intraday basis. One such stock is 3D Systems (DDD). Shown here are charts for DDD over the past four months. Total profit, including winners and losers was a whopping 16.75% from July-December without margin.

Get the Right Symbols for BIG GAINS

To identify these candidates, we use special scans that look for this kind of movement in all stocks across the entire market. Users do not have to run their own scans because we run them weekly and provide the list on our RTX web site.

Some of the stocks in our current RTX Trade List are shown to the right. Monthly and total gain numbers are very strong for this combination. The RTX-3 System will give you a decisive advantage trading the Real Time markets in 2014.

RTX-3 on 3D Systems, Inc. (DDD)

We recently tested DDD (a symbol from our current RTX Trade List), over the past 6 months in mechanical trading on RTX-3. The above charts show some

of the trades generated during the period. Over the past 6 months, DDD, RTX-3 averaged almost 3% total gain over the period was 16.75%.

More Great Performers, July-December 2013

Symbol	Hit Rate	Profit /Month	Total Gain
ARUN	71%	1.83%	11%
DANG	71%	2.83%	17%
DDD	75%	2.83%	17%
DUST	73%	8.67%	52%
NEM	74%	2.33%	14%
TVIX	73%	7.67%	46%
UVXY	72%	4.83%	29%
YOKU	75%	2.83%	17%

Here are some of the statistics from the current RTX Symbol List. These tests were run over 6 months of intraday data, and show consistently high hit rates (accuracy) and monthly profitability. For more results and details on how the tests were run, see:

www.omnitrader.com/RTX-3/Testing

...the Profits Just Keep Rolling In!

is time. Trading
% per month. The
75%, and the

strategies maintained a 75% hit rate. This was just one of the symbols we tested – additional stats are reported below (left). You normally don't see this kind of performance from Real Time Strategies.

DDD Performance
July-December 2013
Total Profit: 16.75%
Percent Profitable: 75%
Profit Per Month: 2.79%

Big Winners, so far in January 2014

RTX-3 is already making BIG GAINS in 2014. Here are some of the best trades identified by RTX-3 so far this year. These trades use mechanical entries and exits. Additionally, by applying the advanced techniques taught in the Trading Lab, users can get even better results (see next page).

1/2/2014	ONVO	Long	+6.21%
1/3/2014	EXXI	Short	+3.24%
1/6/2014	YOKU	Long	+2.16%
1/7/2014	NOAH	Short	+4.03%
1/7/2014	P	Long	+1.37%
1/7/2014	CSIQ	Long	+2.52%
1/7/2014	UAL	Short	+1.36%
1/8/2014	UAL	Long	+2.41%
1/9/2014	ABBV	Long	+2.13%
1/9/2014	WAG	Short	+1.06%
1/9/2014	UAL	Short	+1.46%
1/9/2014	MHR	Long	+4.27%

NEW! Real Time Trading Lab

Get Going in 2014! Trade RTX-3 with us in the Trading Lab.

About six months ago, we decided to staff an official trading laboratory to perfect our approach to Real Time trading and showcase our tools in the live market.

We now have several dedicated staff members operating the Lab, engaging the market each day with our products and techniques. For the first time, customers can log in and watch us - LIVE as we engage the market using OmniTrader, VisualTrader, and our other tools, every day!

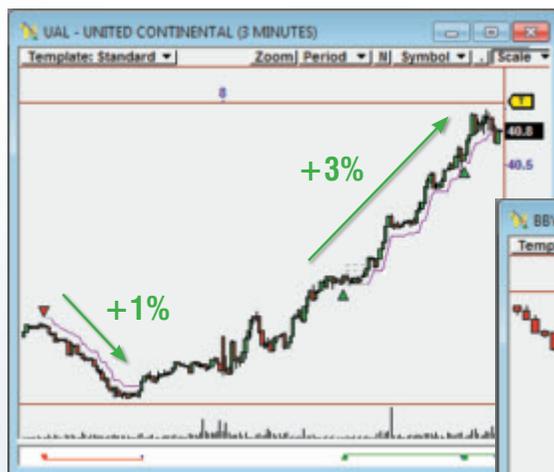

With the addition of RTX-3, we now have great Real Time Signals to prospect from and to apply in fully-automated trading. In addition to trading with RTX-3, we cover key technical setups and how our tools are used to prospect in the live market. The Trading Lab is a winning idea whose time has come!

Our Trading Lab Objective: To Pull Money Out of the Market Every Day.

“RTX-3 consistently fires strong signals. It’s a must have for anybody trading in Real Time.”

– Ryan Belknap
Nirvana Trading Lab Facilitator

Nirvana’s Trading Lab is Finding BIG WINNERS in the Intraday Markets!

These are just a few examples of the great trades we’ve been finding in the Trading Lab.

Engaging the Live Market Every Day!

Special RTX-3 Sessions

Our Trading Lab Staff and I have one primary objective with the Trading Lab, to help our users trade profitably with our tools.

With the advent of RTX-3, we are adding special training sessions during the trading day to help users configure their platform for success.

We have multiple Trading Lab team members, so we can cover important material to help orient users as to what's going on.

This means the Lab is seldom boring and provides a fresh selection of content every day. It's not easy to teach while trading. Let's just say that our Trading Lab Staff earns their pay!

Live RTX-3 Training Topics

- Finding the Best Symbols to Trade
- Profitable Confirmation Techniques for RTX-3
- How to Successfully Leverage Market Events and Direction
- Trade Management – How to Catch the BIG Moves

Additional Training Provided

In addition to trading RTX-3, the Trading Lab will help you learn key technical setups and understand how our tools can be used to prospect and trade in the live market. In all successful trading, confirmation is a key ingredient. Where possible, we want to trade with the market and avoid certain trading traps.

In the Lab, we talk about key chart patterns and offer additional training on such topics as *Which Support and Resistance levels are most significant*, *Go/No-Go decision points*, *When to take profits*, etc. These “mini-presentations” offer a wealth of knowledge for anyone attending the live sessions.

FREE ACCESS for RTX-3 owners

The Trading Lab is a new Nirvana product, which will be available for a fee beginning February 1. As an RTX-3 user, you will have access for FREE for a full 30 days from public launch, and earn a 50% discount on future sessions should you wish to continue attending!

**Trading Lessons Provided
by the Trading Lab.**

Profiting in Real Time with RTX-3

A Comprehensive Seminar by Jeff Drake

Jeff Drake
Director of
Trading Technology

Profiting in Real Time with RTX-3 is a two part seminar that provides you with all of the information you need to apply the RTX-3 Trading Strategies with confidence. Jeff Drake, the chief architect of RTX-3, shows you how to leverage these powerful trading strategies.

In Part I, you will gain extensive insights into the inner workings of RTX-3. Jeff will cover the concept behind each strategy's design, the advantage of multi-timeframe confirmation, and how different settings of the RT Trading Block can be used to match your trading style. We conclude Part I with a thorough discussion of the RTX-3 Trade Plan. Jeff talks about how each stop in the Trade Plan is designed to be used and how the Break Even Stop helps you engage the strategies with confidence.

In Part II, you will learn how to apply the RTX-3 tool set to your actual trading. We begin by looking at how to prepare for each trading day with RTX-3. You will learn how to identify the stocks you should be looking at on a daily basis, and how to get optimal executions with OmniTrader and VisualTrader. Part II concludes with a discussion on applying discretion to the strategies' orders based on other market factors.

With *Profiting in Real Time with RTX-3*, you will gain the knowledge you need to engage RTX-3 quickly and with confidence. It's regularly \$295, but the seminar is included free with your RTX-3 purchase.

Seminar Agenda

In this information packed seminar you will learn:

Part I – Understanding RTX-3

1. The Concept Behind RTX-3
2. The Similarities and Differences of the RTX-3 Trading Strategies
3. The Advantage of Multiple Timeframe Confirmation
4. How to Use the New RT Trading Block
5. The Power of the RTX-3 Trade Plan

Part II – Trading with RTX-3

1. How to Use the Mechanical Performance Edge to Your Advantage
2. How to Prepare to Trade RTX-3 Every Morning
3. What to Look for in the First Hour of Trading
4. How to Optimize RTX-3 Order Execution
5. Managing the RTX-3 Trade
6. Handling the Session Close

Get Ready for Success in 2014

"I am thrilled that we are releasing RTX-3 just in time for 2014! We've been working to achieve mechanical Real Time Strategy performance for years – and we've finally done it!

The RTX-3 Strategies are 100% mechanical, but they are even more powerful when used in discretionary trading. We are seeing phenomenal moves signaled by these Strategies — add just a little chart/market confirmation and Voila!

We normally sell Strategies of this caliber for \$1,500 to \$3,000, but I want our loyal customers to make 2014 their best trading year yet. We're giving you everything you need. You get live hands-on training in our Trading Lab, plus additional instruction on how to identify the best possible moves. The New RT Block can be used to easily improve other Strategies. RTX-3 represents a significant step towards helping our customers succeed in the market." - Ed Downs

Here's all you get with RTX-3: (Reg. \$1,995)

- 3 powerful Strategies, designed to identify powerful trend following intraday moves
- RT Trading Block – improves any Strategy
- Special Trade Plan, designed to work with RTX-3
- Fresh RT Trading Lists, updated weekly

And in the Package:

- *Profiting in Real Time with RTX-3* Seminar - Value \$295
- Access to the Trading Lab for 1 Month - Value \$250

A \$2,540 Value - Yours for just \$995
When you Order by February 5th

**All for
\$995!***

*Early Bird Special:

Be among the First 100 to Order and Take \$100 off the Special Price.
