The Wealth Building Strategy™

Limited
to 300
Copies!

The ONLY Trading System with a
Money Back Guarantee!

The key to building wealth is to make consistent gains regardless of what the market is doing. You need an investment Strategy that can make money in bear markets, bull markets, sideways and volatile markets.

We are Nirvana Systems and we've been building advanced trading technology for over 30 years for traders and investors all over the world. Recently we created a trading strategy that leverages our proprietary artificial intelligence technology to achieve outstanding performance.

How many Trading Strategies can generate profitable Signals year after year, in any market, and on any list? ARM5 RTM-17 may very well be the first of its kind. ARM5 RTM-17 has tested out to be highly profitable on stocks in the S&P, the NASDAQ, and the Russell—in fact it is profitable on all lists we have tried it on back to 2005.

ARM5 RTM-17 comes with OmniTrader Professional, our automated trading software platform AND our unmatched 90-Day Guarantee! If you are interested in building wealth automatically, you owe it to yourself to learn more about ARM5 RTM-17.

*"I have been a profitable, full time trader for four years now. A large part of this success I owe to Nirvana Systems."
- Bill Graves*

What is ARM5 RTM-17?

Nirvana Systems was founded in 1987 for the explicit purpose of developing automated trading technology for individual investors. Over the past 30 years, we have built a solid reputation for providing quality products that are more automated and more powerful than anything else on the market. And now, we've outdone ourselves!

The Power of Advanced Trading Technology

ARM5 RTM-17 is the latest proprietary automated Trading Strategy released by our Labs. Many Trading Strategies are designed for one specific type of market, which means they can easily fail when confronted with sudden changes in trend or volatility.

ARM5 RTM-17 handles today's changing markets. The Strategy compares short term price movement to the longer trend, looking for opportunities to exploit. It can also recognize opportunities in flat or sideways markets and take advantage of them.

Withstanding the Test of Time

ARM5 RTM-17 uses artificial intelligence to analyze the recent market and then uses that analysis to create rules for trending in the current market (see 10-year equity curve, page 4). ARM5 RTM-17 has proven itself to hold up across all market environments.

Guaranteed to Perform

We take the business of building Trading Strategies very seriously, and we believe in what we sell. That's why we offer our unprecedented 90-Day Unconditional Guarantee (see details on page 7). But we also want to protect those who use the Strategy from the pitfalls of overtrading. That's why we have a limited number of copies available. Once we've sold the 300th copy of ARM5 RTM-17, it will be taken off the market.

"The strategy is easy to run, easy to implement and only requires a few minutes of your time a day. As a matter of fact it is so easy that you might feel cheated by its simplicity. But the results speak for themselves."

- Thomas Helget

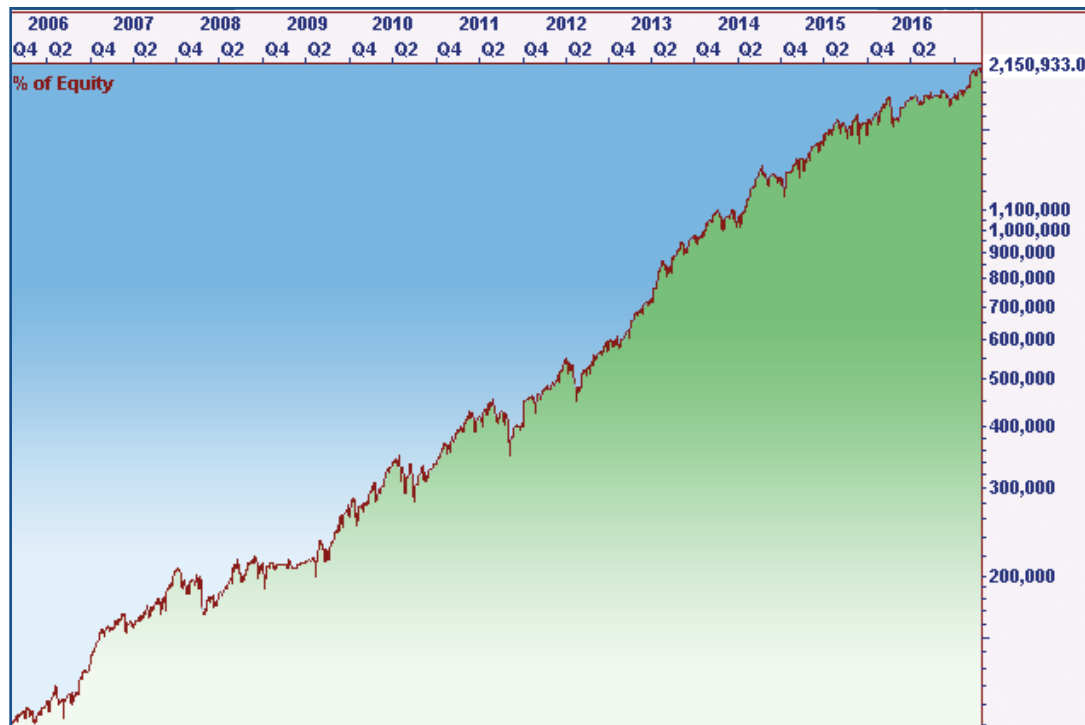

Consistent Gains for Over 10 Years

ARM5 RTM-17 Excels in Any Market

ARM5 RTM-17 has made gains every year in since 2005 in *simulated trading (see right). The key to this remarkable performance is the strategy's use of Artificial Intelligence. This advanced technology allows the strategy to prosper regardless of market conditions.

The equity curve below reflects simulated performance on the stocks in the S&P 100 & NASDAQ 100. But ARM5 RTM-17 works on any stock list in any market.

Never before has a Trading Strategy been available with this level of flexibility or performance. ARM5 RTM-17 has the firepower to help you achieve your wealth building goals.

All statistics generated by applying 10% of equity to each trade generated.

| Year | Return | S&P Return |

The Artificial Intelligence Advantage

Nirvana Systems has established itself as an industry leader in the application of Artificial Intelligence (A.I.) to the financial markets.

We have developed three different A.I. components; the Genetic Algorithm, the Neural Network, and the Consensus Block. By combining all three, we have provided traders with a major advantage. These components not only train themselves based on historical market data, but they continue to learn as the current market unfolds.

Never before has this level of trading technology been available to the individual investor and trader. And now you can put this technology to work for you with ARM5 RTM-17.

ARM5 BREAKTHROUGH

One of our recent advances in A.I. technology was the release of Incremental Training. This type of training uses the most recent data in order to train our A.I. to deliver trades in the current market. This insures that we are getting trades based on what is profitable right now, and performance speaks for itself!
